How To remove a server from the Server selection list in IDENTIKEY Authentication Server (IAS) webadmin login screen.

Summary

On the Webadmin Log In page, you get a list of servers in a drop down list. This article describes how to remove an entry from that list.

Problem Solution.

To remove a server from the list you need to use the admintool.jar. (See the IAS installation guide for windows, for details.)

The command to remove a specific entry is:

```
java -jar admintool.jar server delete <IP>
```
