

KB 140180

Error in XML conversion for DIGIPASS for Mobile 4.7.1.

Creation date: 21/06/2017

Last Review: 23/06/2017

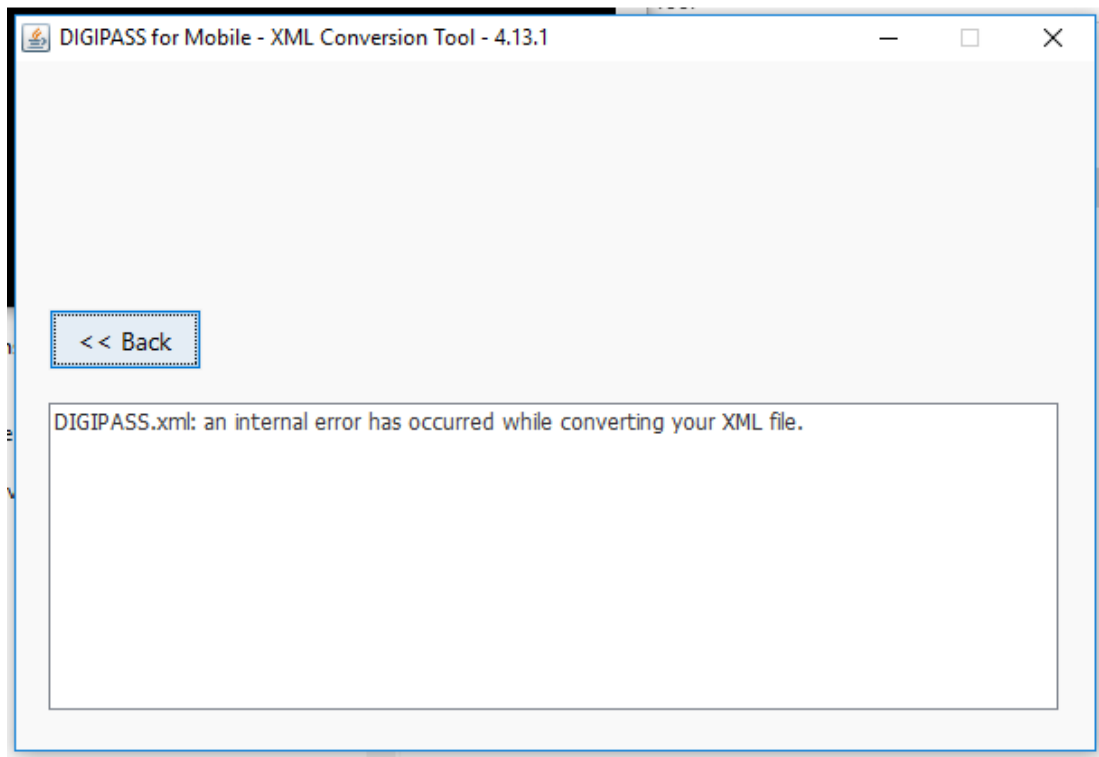

Revision number: 2

Document type: Known-Issue

Security status: EXTERNAL

Summary

When you try to convert a DIGIPASS for Mobile (DP4Mobile) configuration XML with the conversion tool from version 4.7.1 to version 4.10.1 till 4.13.1; you get the following error: an internal error has occurred while converting your XML file.

Workaround

You need to manually modify the configuration XML file.

- Remove the lines that are the cause of the conversion error from the XML file before the starting the XML conversion tool.

The block to remove from the XML is :

```
<App2AppSecureChannelWhiteListURLs>  
  <URL value="MY_APP_SCHEME://x-success?signature=%_OTP_%"/>  
  <URL value="MY_APP_SCHEME://x-error"/>  
  <URL value="MY_APP_SCHEME://x-cancel"/>  
</App2AppSecureChannelWhiteListURLs>
```

- Convert the lines manually into:

```
<App2App>  
  <App2AppSecureChannelWhiteListURLs>  
    <URL value="MY_APP_SCHEME://x-success?signature=%_OTP_%"/>  
    <URL value="MY_APP_SCHEME://x-error"/>  
    <URL value="MY_APP_SCHEME://x-cancel"/>  
  </App2AppSecureChannelWhiteListURLs>  
</App2App >
```

- Add the converted lines to the XML file after the conversion tool has finished the conversion.

The issue will be fixed in the XML conversion tool included in DP4Mobile 4.13.2 package.
