

FLEXIBLE, EASY AND SECURE E-SIGNATURES

ESIGNLIVE™

For end-to-end digital transactions with members

As more and more credit unions strive to become 100 percent digital, e-signatures are seen as a key enabling technology to help increase speed and innovation within the organization, as well as build better experiences for members.

eSignLive™ by VASCO is built for business. With over 20 years of experience developing e-signature solutions for highly regulated industries, Silanis is trusted by leading financial services, insurance, government and healthcare organizations around the world. In fact, we're the most widely used e-signature solution in the market.

With eSignLive, you can electronically prepare, send and sign your documents over the web in four easy steps:

- 1 Upload your documents.
- 2 Identify who signs each document.
- 3 Define where they sign by simply dragging a signature block to the correct location(s) in the document.
- 4 Select a secure authentication method and send!

eSignLive takes care of the rest, managing every aspect of the signing process to ensure your electronic contracts are enforceable, compliant and secure.

HIGHLIGHTS

- Available on-premises and as Software-as-a-Service (SaaS);
- Use as a standalone solution or seamlessly integrate with your core systems/web portal;
- Flexible workflow options – no need to compromise on business, regulatory, technical, budget or any other requirements;
- Highest adoption rates and best signer experience, in any channel and on any device;
- The most comprehensive and powerful electronic evidence provides the strongest legal protection in the market;
- Secure cloud infrastructure – hosted in a state-of-the-art ISO 27001 certified facility;
- Rated #1 in back-to-back reports from G2 Crowd.

Key Features

Legal, trusted, secure and irrefutable

- E-SIGN-compliant e-signatures;
- Authenticate the signer's identity via email, SMS, Q&A and 3rd party knowledge-based authentication services such as Equifax;
- Ironclad signature: digital signature encryption securely seals each signature block;
- Embedded audit trail reports on who signed, in what order, at what time and in what locations.

Anywhere, any device

- E-Sign on any web-enabled device, including tablets and smartphones;
- The Mobile Signature Capture feature enables customers to use their own mobile device as a signature capture pad.

Open and extensible

- Keep your brand front and center – customize the e-signing environment for a seamless transition between your branded application and the e-sign transaction;
- SDKs for both Java and .Net environments, as well as an open REST API with sample code and complete documentation;
- Unlimited access to prototyping and testing in the eSignLive Sandbox environment;
- Mobile SDK to build e-signing capabilities natively into your iOS app.

Turnkey integrations

- Prepare documents for e-signing from virtually any Windows-based application (e.g., Microsoft® Word, Microsoft® Excel, etc.) with the eSignLive Print Driver;
- Pre-built integrations available for Salesforce®, Microsoft® SharePoint, Microsoft® Dynamics CRM and Box.

Winner of IBM's Best Cloud Computing Award and Best Industry Solution for Banking and Insurance
